

Regupol® SoundDeck Extra

Product Description

Regupol® SoundDeck Extra is a resilient structural acoustic flooring system which can be applied straight to timber joists. This enhances the acoustic performance of the system and levels uneven joists, reducing the potential for resonance and squeaking problems once the floor is in use.

Installation

When installing Regupol SoundDeck Extra, the following procedure should be carried out.

1. Ensure that floors are level and clean with no protruding nails/screw heads in the floor
2. Fill all voids between the walls and the floor
3. Butt Regupol SoundDeck boards tightly together
4. Joints should be bonded using CMS SoundDeck adhesive (nails/screws should never be used)
5. Install Regupol SoundDeck Flanking Band around the perimeter of the floor to isolate flooring boards from walls and skirtings

In addition to the supply of Regupol SoundDeck Extra, CMS Acoustic Solutions offers a competitively priced installation service nationwide. For further details contact the CMS Acoustics technical team on **01925 577711**.

Technical Information

Airborne sound insulation ($D_{nT,w} + C_t$) 49dB
 Impact sound insulation ($L'_{nT,w} (C_t)$) 55dB

Benefits

- Specifically designed for refurbishment of timber floors
- Approved as Doc E compliant for conversion and new build standards
- Minimises construction height
- Good low frequency sound insulation enhancement
- Cost effective solution for timber constructions
- Also ideal for precast and beam and block floors
- Ideal for refurbishments
- For additional performance and levelling of newly installed timber joists, 6mm Regupol Isolating Strips may be used

Applications

- Refurbishments
- New build
- Residential, e.g. apartments
- Commercial offices

Physical information

Accessories	Regupol SoundDeck Extra must be used with the SoundDeck Flanking Band to ensure efficient operation
Size	2400mm x 600mm TG4
Overall Thickness	30mm & 34mm
